

**Interreg**

Co-funded by  
the European Union

**NEXT** Black Sea Basin

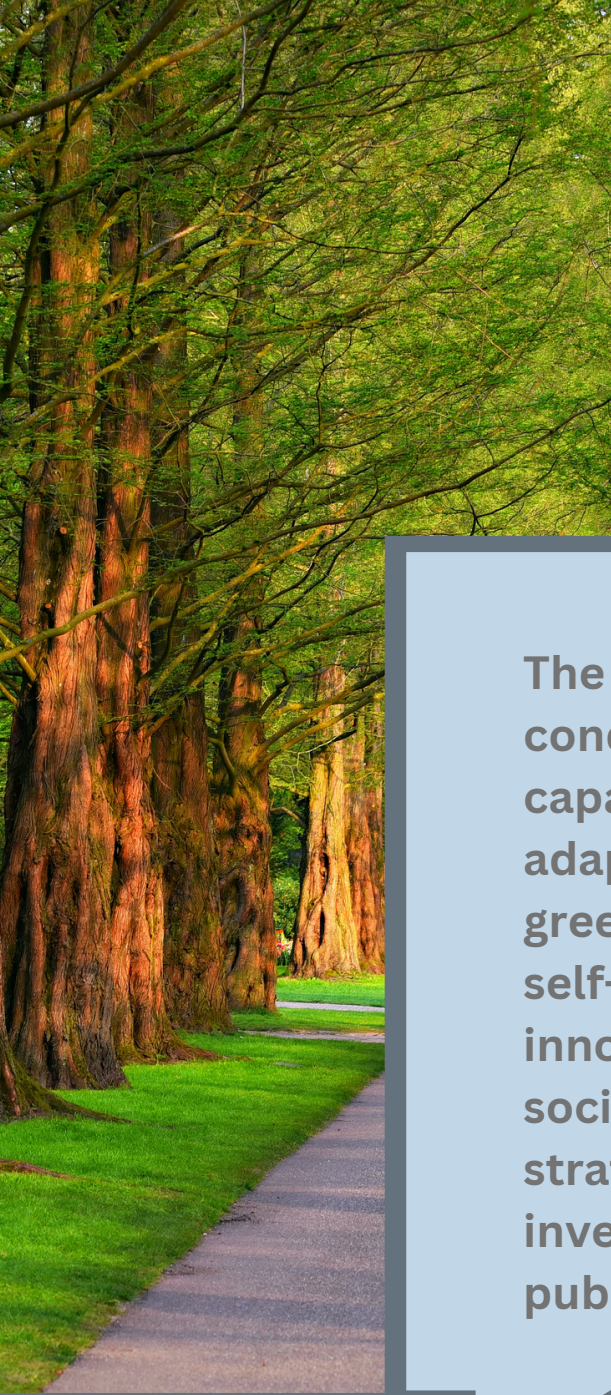

**BSB00108 Regular project**

**CAGOS**

**Clean areas, green and open streets**

# Overview

The project addresses the environmental challenges by conducting training activities to build municipal capacity for climate change mitigation and adaptation, increasing public awareness about the green transition, and strengthening environmental self-awareness. It also focuses on implementing innovative practices and technologies to promote social and environmental sustainability, developing a strategic document "Green Transnational Region", investing in green infrastructure, and transforming public green areas into attractive parks.

# Road Ahead

- Green Municipality Plan with the aim of making cities and regions socially and ecologically more sustainable
- Common strategy document called "Green Transnational Region" for implementing sustainable public policies
- Youth camps focused on environmental education and protection
- Youth roundtables and online photo contests to raise awareness on environmental protection
- Guide to good practices for students to combat pollution and protect the environment
- Reforestation, city celebrations, and creation of "Green Movement" volunteer groups for green actions
- Investment in green infrastructure across all partner regions for clean spaces

# Partnership

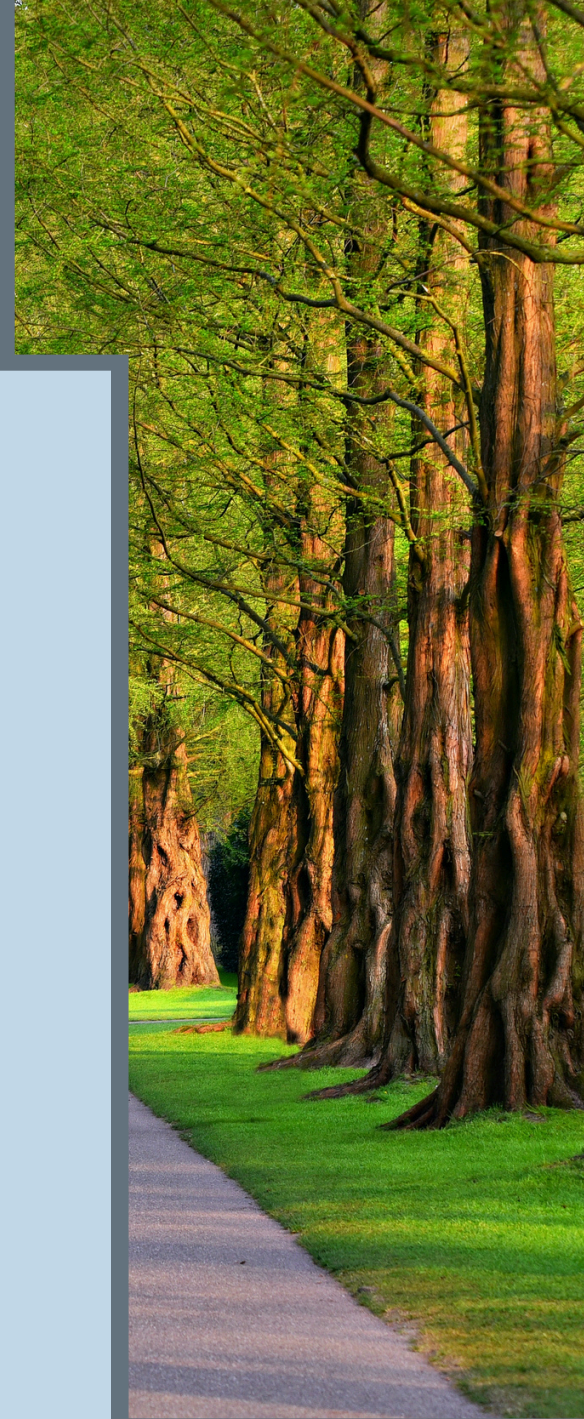

**Lead partner: General Toshevo Municipality**

**Partner 2: Territorial Administrative Unit –  
Murfatlar Town**

**Partner 3: District Council of Taraclia**

**Partner 4: City Council of Bolgrad**
