NBS-CORES

**Nature-Based Solutions to Increase Community
Resilience Against Climate-Induced Disasters**

Overview

The project aims to reduce community vulnerability to climate-induced disasters by implementing nature-based solutions. The project will conduct comprehensive assessments of vulnerability, design tailored interventions, and engage with local communities, government agencies, and civil society organizations. A participatory approach will empower communities with the necessary knowledge and skills.

Road Ahead

- Nature-Based Solutions Action Plan for target municipalities to contribute disaster risk reduction and local resilience building
- Joint curriculum development for Nature-Based Solutions Capacity Building Training Course for municipalities and non-governmental organizations
- Guide for municipalities on developing and implementing nature-based solutions strategies

Partnership

Lead partner: Georgian Institute of Public Affairs

Partner 2: Ecolution Georgia

Partner 3: WRI Türkiye
