NEXT Black Sea Basin

BSB00532 Small scale project

EcoYOU

**Clean and Green minds for an environmental
friendly behaviour**

Overview

The project aims to address the common challenge of pollution in the Black Sea Basin area by developing joint actions to raise awareness among young people about all forms of pollution. The overall objective is to develop joint actions aimed at making young people aware of all forms of pollution through awareness actions, joint camps, and educational tools.

Road Ahead

- Common and Local Clean-up events to protect environment by removing harmful pollutants and waste, safeguarding ecosystems, wildlife, and natural resources
- Joint training for partners related to patrols for environmental protection
- Joint round table event on biodiversity and environmental friendly behavior for citizens to actively participate in decision-making processes
- Joint event of '8 hours overtime for an environmental positive impact' to identify new solutions to reduce environmental problems
- Joint camp with the aim of environmental protection targeting the youth
- Awareness raising seminars at all educational levels for protecting the lakes, rivers and sea from micro plastics
